--Projects

- Color Survey Project (group project)
  – A website where the user picks their favorite and least favorite colors from a color picker and a results webpage is generated from the average picked colors of every user who ever visited the site.
  – Made with Handlebars, CSS, JavaScript, jQuery, Bootstrap, Sequilize and a SQL database, Node.js, Express, and Heroku.
  – Live link at: https://colorproject.herokuapp.com/
- MUZYLITICS (group project)
  – A website where the user enters a band name and gets Youtube links to 5 songs by related bands.
  – Made with HTML, CSS, JavaScript, jQuery, Bootstrap, and Youtube and TasteDive's APIs
  – Live link at: https://timholzer.github.io/MUZYLITICS/
- Weather Dashboard
  – A website where the user enters a city name and gets back the current weather and a 5 day forecast.
  – Made with HTML, CSS, JavaScript, jQuery, Bootstrap, and the OpenWeather API
  – Live link at: https://timholzer.github.io/Weather-Dashboard/
- JavaScript Quiz Site
  – A website with a quiz that is kind of related to JavaScript.
  – Made in HTML, CSS, and JavaScript
  – Live link at: https://timholzer.github.io/Javascript-quiz-site/

--Work Experience

New Frontiers Festival Docent (Seasonal)
Sundance Film Festival 2019/2020 » www.sundance.org ►Jan 2019 - Feb 2019, Dec 2019 - Feb 2020
- Set up and operated a variety of cutting edge VR and AR and XR experiences, including a Unity based mobile AR experience and experiences created by Magic Leap for the newly released MagicLeap One and their AI, Mica.
- Understood and explained the technology to entertainment and industry VIPs.

Freelance Web Developer, Video Editor, Animator, Videographer, etc.
2010 – Present
- Created portfolio websites for people in my film making network.
- A recent project was helping Peter Hollens with automating video effects.
- Biggest client is a network of Youtube channels owned by a company called Valnet.
- Production experience includes working on a feature film set and dealing with SAG actors.

Senior Video Editor
Foursteps » https://www.foursteps.io/ ►February 2019 – August 2019
- Helped build the media department from the ground up. Set up the video style guidelines, while improving workflow with automated animated text creation and project templates.
- Developed their social media ad strategy and planned Facebook ad campaigns.
- Utilizing my knowledge of cutting edge technology and current trends, I developed strategies to grow the Foursteps brand, utilizing analytics to find what is most effective.

Video Editor/ Multiple Roles
Margle Media » http://www.marglemedia.com ►May 2017 - May 2018
- Automated a huge part of the video editing process with my Javascript skills, saving the company thousands of dollars in labor each month.
- I was one of the first employees at the startup and took on multiple roles, including creating standard operating procedures, and training new employees.
- Created content for some of the largest Facebook pages and a few Fortune 500 companies. I created hundreds of videos, with a total view count of over 2 billion.
- Received training for Facebook Business Manager and a social media video analytics software called Tubular to improve ads and video performance.
- Created the branding and animated video outros for clients.

Assistant Editor
About Face Media » http://www.aboutface.media ► March 2016 - May 2017
- Worked as an assistant editor on a variety of documentary projects including a Netflix film.
- Typically sifted through large amounts of footage to find the best content.
